## Objective

I'm a passionate programmer and a backend developer. Looking for a suitable position to prove my ability through a continuous learning process and express my innovative creative skills for self and company growth. I believe in teamwork and effective communication. I look forward to collaborating with other developers and designers to achieve project success. I take pride in writing clean, maintainable code. Ensuring the reliability and performance of backend systems is my priority. I stay up-to-date with industry trends and am eager to learn new technologies.
